PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 2026) with hands-on experience in DevOps engineering, CI/CD pipeline automation, and AWS cloud infrastructure. Proficient in Docker containerization, Ansible configuration management, Jenkins pipeline automation, and Linux server administration. Familiar with Kubernetes container orchestration concepts. Experienced in full-stack development (Node.js, Express.js, MongoDB) with two internships in professional software environments. Seeking an entry-level DevOps or Software Engineer role.

TECHNICAL SKILLS

Cloud & Infrastructure	AWS EC2, ECR, VPC, Subnets, Security Groups, Network ACLs, Route 53
CI/CD & Automation	Jenkins (Pipeline-as-Code), Maven, Nexus Repository Manager, GitHub Webhooks
Containerization	Docker (build, tag, push, run), Docker Hub, AWS ECR, Kubernetes (concepts)
Config Management	Ansible – Playbooks, Inventory, Roles, Ad-hoc Commands, Automated Provisioning
Code Quality	SonarQube – Static Analysis, Quality Gates, Code Smell & Vulnerability Detection
OS & Scripting	Linux (Ubuntu / Red Hat), Bash/Shell Scripting, Process & Service Management
Version Control	Git, GitHub – Branching Strategies, Pull Requests, Collaborative Workflows
Web & Backend	Node.js, Express.js, MongoDB, Mongoose, REST APIs, Apache Tomcat (WAR Deployment)
Languages	Python, JavaScript, C, C++, HTML, CSS

INTERNSHIP & WORK EXPERIENCE

Full Stack Web Development Intern · Proxenix June 2025 – July 2025

- Built full-stack web features using Node.js, Express.js, and MongoDB; developed and tested RESTful API endpoints with schema-driven data models.
- Applied Git branching workflows (feature branches, pull requests, merges) aligned with DevOps source control best practices, maintaining a clean commit history.
- Implemented server-side validation middleware and delivered responsive front-end interfaces using HTML and CSS across Chrome, Firefox, and Edge.

Web Development Intern · Jainson Corp July 2024 – August 2024

- Developed and optimized responsive UI components with HTML, CSS, and JavaScript, improving page load performance by ~20% through asset optimization.
- Collaborated with a 4-member team on feature delivery; participated in code reviews, followed Git workflows, and reduced reported visual bugs by 30%.

PROJECTS

DevOps Automation Hub – End-to-End CI/CD Pipeline & AWS Cloud Deployment

Jenkins · Ansible · Docker · AWS (EC2, ECR, VPC, Route 53) · Maven · SonarQube · Nexus · Java · Git · Linux · Shell Scripting · Apache Tomcat

- Designed and implemented a production-grade Jenkins CI/CD pipeline automating 8+ manual stages: Git checkout → Maven build → SonarQube analysis → Nexus artifact storage → Docker image build → AWS ECR push → EC2 deployment, reducing release time by ~60%.
- Containerized a Java/Maven application with Docker; published versioned images to AWS ECR and managed deployments across 3 AWS EC2 instances for scalable, consistent runtime environments.

- Automated server provisioning for across environments using Ansible playbooks, eliminating configuration drift; integrated SonarQube quality gates blocking 100% of non-compliant builds before deployment.
- Architected a secure AWS VPC (subnets, security groups, network ACLs) with Route 53 DNS management; wrote Shell Scripts to automate environment setup and deployment steps.

Farmly – Multi-Role Farm-to-Table Marketplace

Node.js · Express.js · MongoDB · Mongoose · Nodemailer · Geolocation API · JavaScript

- Architected a 4-tier role-based system (Admin, Farmer, Customer, Delivery Partner) with dedicated dashboards managing complex cross-role data flows across multiple MongoDB collections.
- Implemented secure authentication via Bcrypt password hashing and Nodemailer OTP-based email verification; integrated Geolocation API and designed 6+ MongoDB schemas for inventory and order management.
- Applied custom validator.js middleware for input sanitization and structured error handling across all API routes, producing a maintainable, production-ready codebase.

EDUCATION

B.Tech in Computer Science & Engineering

2022 – 2026

Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

Senior Secondary (XII) – Science (PCM)

2022

Central Academy Sr. Sec. School, Bhilwara

Secondary (X)

2020

Central Academy Sr. Sec. School, Bhilwara

CERTIFICATIONS & SELF-LEARNING

- End-to-End DevOps CI/CD Pipeline – Hands-on project covering Jenkins, Docker, Ansible, AWS (EC2, ECR, VPC, Route 53), SonarQube, and Nexus.
- Programming with Python – Internshala, (Certificate of Completion).
- Programming Concepts in Python – Infosys Springboard, (Certificate of Completion).
- Git & GitHub – Branching strategies, collaboration workflows | Self-study + hands-on practice.
- Linux Administration & Shell Scripting – Self-learned and applied in production-simulation DevOps project.

EXTRACURRICULAR & ACHIEVEMENTS

- Self-built an end-to-end CI/CD pipeline from scratch, independently mastering 7+ DevOps tools (Jenkins, Docker, Ansible, AWS, SonarQube, Nexus, Shell Scripting) beyond classroom curriculum.
- Continuously upskills in cloud and DevOps technologies through hands-on labs, AWS documentation, and project-based learning.
- Participated in college-level coding competitions and hackathons, strengthening algorithmic thinking and problem-solving under time constraints.
